

DEEPER INSIGHTS INTO THE ILLUMINATI FORMULA by
Fritz Springmeier and Cisco Wheeler

PODCAST 13

CHAPTER 6: SCIENCE NUMBER 6 - THE USE OF
ELECTRONICS & ELECTRICITY

Developments in fiber optics, computers, electronic communications, nano-technology, bio-chips & neuro-electrical research have combined to bring mankind to the point where mankind can be controlled by one centralized monolithic Beast computer. The ultimate mind-controlled slavery is now possible. We are in the first stages of its implementation.

The chapter will be organized in the following sections & subsections:

Section A. An Overview of the subject A1. Where this article is headed GLOSSARY OF TERMS FOR UNDERSTANDING ELECTRONIC MIND CONTROL Bio-medical telemetry EMF weapons Psychotronics Remote Viewing (RV for short)

Syntel A2. Where the NWO is headed Pyramider

Section B. An intro to implants B1. Three typical implant victims B2. Documentation of implants REFERENCE PAGE FOR UNDERSTANDING ELECTROMAGNETIC WAVES & MIND-CONTROL B3. GWEN Towers B4. Body suits Section

C. Specific Implants C1. Audio implants (a. public. b. secret) BACKGROUND INFORMATION BRIEF

CHRONOLOGY OF AUDIO IMPLANTS BASICS OF HOW THE IMPLANTS CAN FUNCTION USES OF THE IMPLANTS TYPES OF AUDIO IMPLANTS: Part A. Publicly admitted audio implants Part. B. Secretly implanted audio implants COCHLEAR DENTAL AUDITORY RIDGE C2. Body manipulation implants C3. Visual holographic implants HOW THEY WORK TYPES: FIBER OPTICS ARTIFICIAL LENSES BIO-CHIPS HOLOGRAPHIC OR H-INSERT HOLOGRAPHIC IMPLANTS VIA NANOTECHNOLOGY & NANOBOTS C4. Memex/Brain Link implants INTERFACE DEVICES ORGANIC BIOPROCESSORS LINKED TO VIRUSES PSYCHICS C5. Torture/Nerve & Muscle Stimulation Implants C6. Tracking & LD. Implants

Section D. Direct monitoring & manipulation of the brain/mind D1. Direct monitoring TESLA WAVES USED TO READ MINDS & IMPLANT VOICES D2. Direct manipulation SUMMARY OF ELF WAVE MIND CONTROL CAPABILITIES

Section E. Auxiliary uses of electronics & electromagnetic waves E1. hypnotic induction E2. polygraphs E3. attacks against people & objects LIQUID CRYSTALS "ALIEN" implants BED COILS STANDARDIZED FOR MIND-CONTROL POTENTIAL E4. virtual reality

Section A. An Overview of the subject.

A1. Where this article is headed

This chapter is designed to cover the complexities of hi-tech mind-control in simple-to-understand language. To accommodate those who are more technically literate and who want more, some clues to more technical sources are given, but time & space limitations mean that much has gone unsaid. My deep thanks to the many victims, who

placed their trust in me to get their stories out to the world. I hope that I have vindicated their trust. There are a number of disinformation agents that appear to be putting out good information on implants, but are actually disinformation agents. We can error by undershooting or overshooting the truth. The principle topics that these pretend "whistle blowers" have been discussing are the tracking implants and remote viewing. (For RV info, see Theta Programming material in Vol. 2.) Neither topic is any revelation, nor are they the most dangerous items in the elite's electronic mind-control arsenal. If the reader has not skipped chapter 5 on disinformation, then he will be aware how factual information can be used in deception, such as in chicken feed & building bona fides. Why is it that the TV program "The Real X-Files" shown on channel 4 was created by a CIA operative, Jim Schnabel? And why are all the "private" Remote Viewing organizations run by what appear to be entirely all intelligence operatives (such as Ed Dames, et. al.)? And why do we see mind-control specialists, like "ex"-Intelligence officer C.B. Scott Jones who gets involved with several UFO research organizations & disseminating disinformation? One "researcher", who is publicly exposing" the NWO, tried to convince this author, "The government has no secrets." (A word-for-word quote by the way.) He needs to read a supplement to the National Industry Security Pro grain manual (Mar. 92 release) where the Air Force teaches their DoD contractors how to construct cover stories to lie about the nature of their work for the government. I will not take cheap shots at the World Order, & I will not intentionally mislead the reader. You will get the whole truth and nothing but the truth, as well a single chapter can present it. Vol. 2's chapter 6 which was on this same subject was not the final word and neither is this chapter. Before I start passing on lots of information, I should clarify one point. Human brain cells communicate by superconductivity, not electricity. Electricity travels

near the speed of light, while superconductivity is in the range of the speed of sound. Government researchers have a device called a SQUID (Superconducting Quantum Interference Device) which actually monitors the light flowing from brain cell to brain cell. This is why over 5% of the brain's dry matter weight is iridium and rhodium. However, this does not subtract from the fact that electromagnetic waves have the ability to change what the brain experiences and thinks. I must also provide a small glossary for electronic mind-control terms that most people are not familiar with.

GLOSSARY OF TERMS FOR UNDERSTANDING ELECTRONIC MIND CONTROL

Bio-medical telemetry-Transmitter-receivers that are often located at the base of the skull which record body functions & brain wave activity. Their data is sent to remote computers for monitoring. A bio-medical telemetry implant may also function as the primary control implant on body suits of implants. Early versions were used on astronauts.

EMF weapons-Electromagnetic Frequency weapons. These basically are machines that can modulate and beam electromagnetic waves in such a fashion that they control biological/mental functions within the victim. Portals to the central nervous system can be manipulated to create visual images, project voices into the mind, and create pain, moods and emotions.

Psychotronics-This word was originated from Soviet research. The American public have mistakenly thought that the word is equivalent to psychic activity. A more precise translation of the Russian term would have been "applied psychoenergetics". American psychotronics

research was initially done at Stanford Research Institute. This is the Theta Programming that Vol. 2 described.

Remote Viewing (R V for short)-This means psychic viewing of something.

Syntel-This is short for synthetic telepathy, which is the remote sending of voices and thoughts into a victim of electronic mind-control. The military and intelligence agencies have successfully achieved this capability and have carried out countless meetings over their possible uses of syntel.

A2. Where the NWO is headed

Since 1991, this author has been in contact with various victims of implants. The natural first reaction of many initial listeners would be skepticism to the subject. The psychological profession has had articles in their professional journals ridiculing these poor victims. If a fair-minded person will match the experiences of what one can witness happening to these implant victims (as well as their evidence) to the cutting edge of what science is researching and capable of doing, then there is no doubt that implants are being used on an ever increasing mass scale. The World Order is using amplifiers, generators, electronics, listening devices, non-ionizing electromagnetic radiation, a snapping type sound energy that hits and burns the body, closed-circuit videos to monitor implant victims, nanotechnology, and tracking devices that scanners (incl. mobile hand-held scanners) can pick up- JUST to name a few. This chapter will provide an indepth overview of many of these electronic mind-control gadgets.

Unfortunately, the twilight zone of Big Brother is upon us. People (such as limousine drivers) that have been around the movers and shakers report that they brag about these

technological controls. The technology described in this chapter, such as nanobots, and holographic implants are in the “R&D stage” of use. What is meant by “R&D stage” means that the World Order is using a large variety of experimental items, but the reader should be forewarned that this does not mean that these items are any indication of where the World Order’s actual secret R&D is at. This author has worked with enough mind-control victims to have established several facts:

- Society is getting only the crumbs of what is known by the World Order’s hierarchy.
- The World Order is releasing technology at a control rate, much of it through mind-controlled slaves who are programmed to “discover” a particular “discovery”. They are in reality only disclosing what has been known in secret, and their discoveries are actually helping cover up where the World Order’s secret research is at. However, it’s not difficult to see the direction the World Order is headed. They are working at making virtual reality (aka cyberspace) the “in” thing. They are fusing the human mind to computers. Computers/robots are taking over human jobs, and humans are becoming more like computers/robots. Sci-fi gurus, cyberpunks, and establishment scientists are selling and advertising this technological direction as “freedom”, and the crowds of sheep are accepting things like brain implants as “survival equipment” and “freedom”. The cool” technological pied pipers of our time are teaching our children that gadgets that remove their minds from reality are giving them new freedoms. But this chapter is written because there are still a few people with the neural-receptors and the computing capacity left in their craniums to comprehend the dangers that these mind-controlling devices have for humanity. Witnesses have told me that the creation of “robocop” type

cybergs (the fusion of man & other equipment) has already been experimented on in secret. Indeed, the government gave out research contracts for cyberg research back in the 1960's. And the use of electro-magnetic waves (esp. Tesla waves), implants, and other electronic devices by the Illuminati for mind-control is on the increase. How much of a genuine threat do these things pose humanity? [I'll spell it out for the reader, but we must remain calm, a fear-based response only makes things worse.] Yes, it is true that the NSA can remotely track people if they know the specific EMF waves (evoked potentials from EEGs in the 30-50 Hz, 5 milliwatt range) of a person's bioelectric field. Each person's emissions are unique, just like their fingerprint, palmprint, and their voiceprint. This means that the NSA can remotely track anyone in public. And yes, it is true that the NSA's RNM system can remotely send EMF Brain stimulation signals which create visual images, subliminal audios, what appear to be audible sounds, and thoughts into people's minds. Yes, it is true that body suits of implants are used to control people's minds and bodies, as well as track them. Yes, it is true they have voice prints of hundreds of thousands of Americans and can identify & track via their computers all electronic communications in this nation. Most phone calls go through about 30 computers before they reach their destination. The phone companies computers, according to someone who worked for AT&T and witnessed it, record ALL phone calls using computers. However, to weed out the worthless from the worthwhile, the Illuminati's fronts use a list of key words, such as names or phrases called THE WATCH LIST which the computer uses to identify conversations worthwhile to listen to. Even though the NSA uses supercomputers, it is monitoring most communication on the entire planet so they have to squeeze the WATCH LIST as tight as possible. According to Bamford, James. The Puzzle Palace. NY: The Puzzle Palace, 1983, p. 459, "...according to Raven,

programmers would simply reduce Malcolm X to the last two letters in his first name (lm) followed by a space and then the letter X. Then any time an intercepted data communications containing that particular combination of letters and spacing (lm X) streamed past the computer's reading head, it would automatically be kicked Out for further analysis. Part of the reason that the computers are swamped with Watch list submissions is that many items require numerous entries. When searching for derogatory references to President Richard M. Nixon, for example, technicians would have to program a variety of possible key words, such as "Tricky Dicky". This, according to the former G Group Chief would be converted to The new technology which is being implemented in stages includes computer imaging of a person which makes a "whole body map" of the person's body which is stored in the computer. Something that has been only developed for a narrow use by the NWO is the downloading of the holographic image of a person's thoughts so they can be transmitted to another. (See Appendix 3 on cloning for more on this.) The majority of the few people who know this is going on wouldn't waste time reporting it, because the public wouldn't believe it anyway. However, some prominent scientists are predicting that it is just around the corner. The three top research institutes in this field, Stanford Research Institute, MIT, and the Carnegie-Mellon Univ. all have people saying that this capability is "almost here". Austrian born Hans Moravec, dir, of the Robotics Inst. at Carnegie Mellon Univ., is quoted in The Indianapolis Star, 6/14/1987, in an article entitled "Immortality", "In an astonishingly short amount of time, scientists will be able to transfer the contents of a person's mind into a powerful computer, and in the process, make him-or at least his living essence-virtually immortal." MIT artificial intelligence researcher Gerald J. Sussman states, "I'm afraid, unfortunately that I'm the last generation to die. Some of my students may

manage to survive a little longer.” But as fantastic as all these powerful capabilities sound, there are glitches in their electronic control of humans.

As an outsider looking inside for a number of years, this author has been able to take note of some of the success and failures of the New World Order’s electronic mind-control. First, the NSA picks up so much intelligence information, they are drowning in their own information. Only so many people can make decisions, and they can only digest so much information. They may try to manipulate people and events, but Christians (who are free of the mind-control) can step through those manipulations by having the mind of Christ. Next, if a person understands who they are & believes in following Christ, outside visions & outside or strange voices or thoughts do not alter the course that a person will take. Most of the people this author has met who have been subjected to remote electronic control over their mind—HAVE REJECTED the instructions & harassment of their electronic handlers. Not only is it clear that the voices are being transmitted from an external source to the victim, others can also detect that something is amiss. The element of secrecy is missing. One man spent an afternoon talking to this author about the World Order had tried to electronically control his mind, and turn him into a drug pusher. He had successfully foiled them for several years. Although he has had to flee & try to go into hiding to keep his own mind. The most powerful mind-control is still trauma-based mind control built on a foundation of multiple personalities (dissociated personalities and dissociated parts of the mind). It appears that electronic mind-control is being overlaid on top the mind-control based on dissociation. When this is done, the electronic mind-control is frightening, because the victim’s consciousness is not able to think passed the electronic mind-control which catches their undivided attention. They

are too distracted to deal with the deeper issues of trauma-based mind-control.

Imagine being a programmed multiple, and your handler doesn't have to even be near you to relay complicated codes and instructions. He can use your implant. But again, how serious is electronic mind-control? Let me relate to you about a guided tour that a civilian friend of mine took through a NWO's major beast computer center in Alaska back in the 1970's. The engineer, who was in charge of building and getting the center operational, gave him a tour of the site's capabilities. At that point, the NWO had built a massive computer center in Alaska, one in So. Africa (believed to be located at the U.S. embassy in Johannesburg), and one in Pine Gap, Australia. These three sites were very specific, because they formed a triangle on the globe, and couldn't be located anywhere else, due to the naturally occurring lines of force of the planet. These Beast Computer Centers consist of aisles and aisles of big state of the art computers. They each have several dozen people to run them. Even in the '70's, an operator could speak into the computer and it would answer. For instance, if you asked the computer about anyone on the planet, it could usually pull up all kinds of information about that person. If you asked the computer how could you get that person to kill someone? or how can I isolate this person? The computer would spill out a plan almost instantly, telling you all the people around that subject who could be manipulated and in what fashion those people need to be manipulated to cause the end result. This is the end result of years of "BLACK PSYCHIATRY-which means applying psychiatric techniques to manipulate people and nations. These computers electronically connect to some of those people who are electronically controlled, so that the controllers can actually control the world from a computer. These computers also store vast amounts of personal

information about people's thought processes and thinking. It is possible that electronic surveillance is being done to read the thoughts of people and that the computers are actually able to store this information in some usable fashion. Because this is so secret, they can't give any hints of their vast ability to monitor thoughts, as well as organize and store those thoughts. This sounds like science fiction, but from people who invent & work at state of the art technology, this is actually said to be old technology. They are limited in how they use this technology because they want it to remain secret.

Meanwhile on the surface, the public system has automated fingerprint identification with the AFIS system, and has automated birth certificates electronically too. This all ties in with the intense desire of the World System to use the potential of their computers' memories. Large Neural computers that have artificial intelligence using neural processing which is a type of learning similar to learning done by the human brain are being used. Recently, the world champion chess player was beat by a computer. This author's friend, who toured the Alaskan computer center, was shown how a war could be created between any two nations. The operator merely asked the computer what it knew about a certain country and then ask it how could a war be created with a neighboring country. This is the end result of countless studies such as the U.S. military reference book Basic Psychological Operations Study (BPS) which outlines country by country, specifying where each country is vulnerable for PSYOP operations (psychological warfare).

This kind of thing has a long history. For instance in W.W. II, the Office of War Information and the OSS cooperated in psychological warfare projects. What this author's friend saw was a network of Cray-type computers, perhaps similar

to the EMASS system of Cray computers that E-Systems developed. Such a system can store 5 trillion pages of text and work with that data base with lightening speed.

The reason this author's friend was allowed to see this technology, was that he happened to be at the right place at the right time, and the Engineer operator of the Beast Computer said that this system was obsolete. Which is true, today's 9 Beast computers are much better at speech than the computers at these three control sites were in '73. The Beast computers can (according to another eye witness who used it) hear human voices and determine what language is being spoken and then can listen and answer in that language. These computers link directly to thousands of mind-controlled slaves and can- via various methods- almost instantly control the behavior of numerous people. This, along with good old fashioned phone calls, allows the elite to manipulate events very fast.

Anchorage is the site of a National Security Agency NSA listening post(LP). The Beast computer was located northeast of Anchorage, and so is the HAARP project. The HAARP facility is near Gakona, a hamlet about 140 miles north of Prince William Sound and its signals travel on a field line to Australia. The Beast Computer is also linked to Australia as well as satellite systems. The HAARP site took a 4-wheeled truck to reach, and the Beast Computer site in 1973 was even more remote. The University of Alaska Fairbanks (which has its own super computer) and the Alaskan Poker Flat Rocket Range also were involved with the HAARP project. 30% of the U of A's supercomputer's use was for DoD projects.

HAARP uses 3 powerful transmitter sites in Alaska. Somewhat on the flip side, the human brain which they control can, IF it has a memex implant, interface with the

Beast computer which acts as a vast repository of human knowledge as well as answering questions to essentially all previously answered questions instantaneously. If the human brain has some type of virtual reality holodeck attachment, the computer can even walk the slave through a realistic setting indistinguishable from the real world. Robocop or robo-soldier has an incredible advantage with such extended memex/remote viewing capabilities.

The World Order has experimented in memex/remote viewing along several divergent paths. One method has been psychic (demonic) method, where the “natural” mental facilities of the human are trained. The other route has been high-tech. According to eye-witnesses both methods have yielded positive results, although it sounds like they are still refining their capabilities. The word telematics has come into use to denote the interconnection between computers and telecommunications. France has a National Telecommunications Research Center, which works with groups such as CII-Honeywell Bull (Jean-Pierre Brule, Pres., & Emmanuel de Robien, Sec.-Gen.). CII-Honeywell Bull did telematics and implant research, and so has IBM France. IBM’s subsidiary SBS developed satellite-based communications. In Britain, their National Physical Laboratory NPL has been active in telecommunications research. Professional computer groups have umbrella groups such as the British Computer Society, which help determine policies.

In the U.S. the National Center for Supercomputer applications works on virtual reality interface with humans. Meanwhile SCAN (Swinburne Centre for Applied Neurosciences, Hawthorn, Australia 3122) has been working on how to monitor human thoughts. These are just a few of a vast network of research groups applying their

efforts to the types of things you will read about in this chapter.

Around 1973, TRW began designing a satellite that would allow the CIA to communicate with its assets/agents in “denied areas”. This was code-named Pyramider, and used frequency hopping. The signals can be hidden among random urban radio transmissions. (See Robert Lindsey, *The Falcon and the Snowman*. NY: Simon & Schuster, 1979, p. 218)

Some people who are related (in some fashion) to the CIA have been receiving Syntel implants that are communicating to them using signals that frequency-hop. So the proof is in the pudding, the CIA used Pyramider to contact implant victims. The World Order does not use every technological gadget they have in every situation. Use of secret weaponry is restricted so that the weaponry remains secret. This is one reason why victims of mind-control display such a wide variety of symptoms and control mechanisms. But what is scary is that any bozo can already purchase on the public market a frightening array of electronic mind-control devices.

Information Unlimited puts Out a catalog that any bozo on the street can order from which advertises 200,000 volt stun guns, laser ray gun, compressed air guns (Air Tasers) that knock people down with probes that attach instantly to the human target and jam their nervous system with T-waves, laser listening devices to listen at long range via their windows, implants along with the tracking system to keep track of people, animals or objects. They also sell other novel devices. While this author has that catalog that advertises for sale computer chips to implant people with, the psychiatric profession is helping cover-up Big Brother’s implant technology.

For instance the Journal of Nervous and Mental Disease, Sept. 1995, Vol. 183 (9), pp. 603-604, has a story about two males (aged 33 and 53 years old) who were labeled delusional because they complained of implants hidden in their fillings in their teeth. The article is entitled, "Delusional electronic dental implants: Case reports and literature review." The shrinks concluded the two men were obviously mentally ill and needed treatment with drugs because they are claiming that they have electronic dental implants. The psychiatrists wrote, "neither had any insight into the implausibility of the delusion." The doctors gave antipsychotic drugs, and physically intervened to "prevent an inappropriate dental extraction." According to the article, for some unknown reason, the two men "responded poorly" to anti-psychotic drugs. It never occurs to the psychiatrists that the reason the anti-psychotic drugs didn't work is possibly because the men's complaints were legitimate. The two shrinks were E. Sherwood Brown and Michael T. Lambert.

There are other cases too, where people complaining of implants have been labelled "delusional" by psychiatrists. The Amer. Psychiatric Assoc. is guilty of refusing to seriously review evidence that harassment & mind-control may be impacting people mentally. DSM-IV reflects this continuing refusal to accord victims of electronic mind-control any official recognition by the therapeutic community. Based on research by Drs. W. Fry & R. Meyers, the Network has learned how to make brain lesions of a minute controlled size with ultrasonics, rather than doing a lobotomy. In 1963, Dr. Peter Lindstrom at the Univ. of Pittsburgh was able to use a single unfocused sonic beam to destroy fiber tracts in the brain without damaging the nerve cells near them. Sonic beams (sound waves) can be used to control human thought. (We'll discuss sonic beams

some more later, now let's delve into a key part of their electronic control-implants.)

SECTION B. AN INTRO TO IMPLANTS

B1. Three typical implant victims

Let's look at three victims who suffer from of mind-control implants & body-control implants, who are known by this author. We can refer to them as "Amy", Victim No. 1001..., "Betty", Victim No. 1002..., and "Cathy", Victim No. 1003... -"Amy" determined by using a spectrum analyzer that she had waves of 750 mhz targeted on her. "Betty" determined that she had the entire spectrum of radio-microwaves hitting her in a Morse code pattern. The transceiver (transmitter/receiver) for the signals was a fiber optic receiver made to look like a pubic hair that repeatedly burned holes in her underwear. Apparently, this side effect is a "bug" they haven't gotten out of the technology. "Cathy" has ELF & VLF waves of 435 & 1080 Mhz signals targeted on her. When she's active both types of waves come, and when she remains still the 1080 signal fades. (435 is in the 400-450 Mhz band which is the window to the human consciousness, and 1080 is in the 1000 to 1200 Mhz band.) They are also using a Nitrogen particle beam, which produces "nitrogen narcosis" (like the bends) in targeted victims. Xenon lamps can affect the mind and body, too. 435 Mhz is converted to 1080 by interaction with the high-atmosphere HAARP project. The 1100 (1000-1200) Mhz frequency can affect genetics. Implant RF frequencies have been damaging the eyes of implant victims. Although this gives us a starting point in our discussion, these are not the only frequencies that threaten mind-control victims. (See Section D1 for direct monitoring /manipulating frequencies.) Author W.H. Bowart in his Vol.1, No. 1, pg. 1 Freedom of Thought newsletter quotes Brian Bard of

Glendale, CA who wrote, "I failed to discuss the utilization of power in modern mind control implants. Like Delgrado's stimoceiver, no internal power source is necessary. The same electro-magnetic energy which is collected through induction by such relays produces an internal electrical charge of equal energy. Utilizing a capacitance circuitry design, the charge is stored as a mechanical distortion of the crystalline lattice and discharged as a focused pulse of electro-magnetic energy at a lower frequency. Higher frequency E-M has a higher energy state than lower frequency. Thus, the effective output of photons may be twice or thrice the potential of the relays." A more advanced design in use utilizes 50 or more distinct channels for various functions. Not only the encrypted primary input signal utilized for signal output, but several channels are reserved for supplementary energy induction. With integrated switching, both passive and active surveillance of brainwave activity may be enhanced. Contrawise, signal output may be boosted and focused on specific neural pathways. The devices remain active, programmable signal relays with multiple selectable channels so long as electro-magnetic induction continues to occur."

Modern microchip implants will have 250,000 components. Certain electrical freks will trigger certain neurochemicals. The frek 7.83, which is the elec. field resonating between the planet & its ionosphere, makes the subject feel in one with all creation. But it isn't quite that simple, because a 7.83 frek can be sent in numerous different wave shapes, such as the rolling sinusoidal pattern, jagged sawtooth waves, rectangular (flat on top, flat on bottom) waves, and they all have a different effect on the brain. (Mega brain, pp. 108-109) One can imagine the potential power an implant that could create the proper frequencies could have over an individual.

B2. Documentation of implants.

On the following pages, are the startling anechoic chamber results when two victims of syntel implants were examined. (Synthetic telepathy implants give thoughts & voices.) These two pages document that they were receiving signals, in fact, the anechoic chamber results helped to pin point what building those signals were coming from!

REFERENCE PAGE FOR UNDERSTANDING ELECTROMAGNETIC WAVES & MIND-CONTROL

The best way for people to understand electromagnetic waves is to think of the ocean's waves. Some waves in the ocean are big, and some are small, size is amplitude.

Some beaches have waves that come quickly and some have waves that come slowly, this is called the frequency that the waves comes.

Researcher figured out how they could change the amplitude or the frequency of electromagnetic waves in a controlled way, and this is called amplitude modulation or frequency modulation.

Because all electromagnetic energy beams travel the same speed 3×10^{10} cm/sec, an energy beam with a short wave must have many more of those short waves pass in a given time such as a day than a long wave. The shorter the wave the greater the frequency that a wave will arrive. While our image of an ocean is that it moves up and down in relation to the surface.

In other words, the ocean wave moves (vibrates) up and down in relation to the surface (a mathematical plane).

Electromagnetic waves vibrate in 3 dimensions (relative to 3 planes), generally they are only drawn as one-dimensional waves. Our brains operate on waves that are very low frequency (from one cycle per second) to about 50 cycles per second. A cycle per second is called a Hertz (Hz). Due to the wide range of different amplitudes and frequencies it has been more practical to induce various measuring units. It would be nice if all the measuring units could be done in feet or meters or whatever, but the range in size from the very tiny to the very large means that they use different measuring units. Just like you use different measuring units to get a quart of milk and 3 gallons of gas. The milk could be called a quarter-gallon but it isn't. In measuring frequency they use the following measuring terms:

1000000 cycles per second = (mega hertz) 1000 cycles per second = (kilo hertz) 1 cycle per second = Hertz

In measuring amplitude they measure the length of the waves with kilometers, meters, and centimeters. The very small waves are measured in angstroms, microns, and nanometers. What is an angstrom. A nanometer is one billionth of a meter. That is a very tiny fraction written as $1/1,000,000,000$ of a meter or for short a nanometer. A micron is one millionth ($1/1,000,000$) of a meter. Ten nanometers are said to make up an angstrom. (In other words an angstrom is 1 ten-billionth of a meter.)

After they measure radio frequencies, the waves of different lengths are given other names. They could just say 'waves from 30,000 to 300,000 MHz', but instead they shorten things by having a special name for these waves EHF (Extremely High Frequency waves.)

This names are as follows:

Extremely High Frequency EHF: 30000 to 300000 mega hertz
Superhigh Frequency SHF: 3000 to 30000 mega hertz
Ultrahigh Frequency UHF: 300 to 3000 mega hertz
High Frequency VHF: 30 to 300 mega hertz
Medium Frequency MF: 300 to 3000 kilo hertz
Low Frequency LF: 30 to mega hertz
Very Low Frequency VLF: 3 to 30 kilo hertz
Extremely Low Frequency ELF: Below 3 kilo hertz to 1 hertz or less

BRAIN FREQUENCIES (FREKS) RELATE TO STATES OF ACTIVITY

The lower brain frequencies pertain to sleep and dream states. The middle brain frequencies pertain to normal wakeful activity. The higher brain frequencies pertain to aroused, or concerned or states of anxiety. No brain waves means a person is "brain dead", even though some body functions may continue. Naturally occurring phenomena, such as lightning in a thunderstorms, sunny days that soak a person with extra positive ions, can all affect the thinking of brain.

CHART GOING UP THE FREQUENCY SCALE

These frequency numbers are in Hertz which is cycles per second. (However the first part of the scale are non-linear, asymmetrical waves, which are mistakenly called Hertzian by many people.)

1 Approx. beginning of brain waves

6.66 Theta brain waves
7.85 Alpha brain waves
15.7 Beta brain waves
30-30.56 Government VLF stations
32-33 Government VLF stations
34-42 Government VLF stations
50 Approx. Upper limit of brain wave frequencies
60 Produces an audible sound

62-254.1 CTCSS (Continuous Tone Coded Squelch Systems). These tones CTCSS tones are broadcast continually interspersed on a frequency, which allows several different users to broadcast separately on the same frequency and only pick up the message that has their CTCSS tone.

Post Office Tones are 82.5, 91.5, 97.4. & 100.9. U.S. Customs & border patrol is 100 Hz. U.S. Secret service is 103.5 Hz. EPA is 114.8. IRS & BATF is 123.0. Veterans Affairs, GSA, & Dept. of Energy is 127.3. Fed. Aviation Admin. & U.S. Marshall service is 136.5. Coast Guard Intell. is 141.3 Hz. Dept. of State & Border Patrol is 151.4 Hz. Drug Enforcement Agency, Fed. Aviation Admin., & Nat. Marine Fisheries is 156.7. Justice Dept., FBI is 167.9.

10^2 (10 x 10) Ultrasonic

10^3 Lower range of true Hertzian waves, waves in cycles per sec lower than this such as the human heart beat or Brain alpha waves are not Hertzian.

104 (10000)

16000-32000 Range of Frequencies used in European implants to signal the implant.

54900,000 Hz (54.9 MHz) Cellular phones (Also 435 MHz, 750 MHz, & 1080 mega hertz have been discovered being targeted on victims of implant mind-control.)

10^{11} to 10^{12} Far infra-red

10^{13} "Raman" I.R.

10^{14} Near Infra-red

10¹⁴ to 10¹⁵ Visible light spectrum

B3. GWEN Towers

The GWEN towers can be used for several purposes, including ELF waves used for direct mind control which will be covered toward the back of this chapter. Because they also are part of the implants system they are included before the chapter discusses implants. Unfortunately for us humans, ELF waves can penetrate almost anything. The U.S. Military has built a Ground-Wave Emergency Network (GWEN) all over the U.S. with several hundred 300-500' GWEN towers that broadcast a very-low-frequency wave (VLF) for mind-control of the American public. A single GWEN tower can broadcast up to 300 miles in a 3600 circle. Plus 8 secret powerful ELF transmitters have been established and 3 of them operate on the west coast. It also needs to be pointed out that many items that are receivers can also function in the role of transmitters. Televisions, cellular phones, even air conditioners can be used to bounce signals to somewhere. Many strange towers and transmitting devices have been installed all over the U.S. in recent years.
