C 6. TRACKING & I.D. IMPLANTS

This type of implant has gotten most of the public's attention. For several years now the public has been aware that animals, military personnel as well as civilians have been given tracking implants. Objects also have received tracking implants. DCI of the CIA Bob Gates is reported to have said, "If you can't identify people, you can't control them." The Wall St. Journal, 3/30/1992 reported that the FDA proposed that tracking devices onto 35 classes of medical devices such as heart valves and breast implants. The excuse was that they needed to track life-sustaining medical devices better. The list of devices to be tracked includes cardiovascular filters, defibrillators, pacemaker electrodes, heart valves, tracheal prostheses, breathing monitors, portable oxygen generators, ventilators, infusion oxygen generators, ventilators, infusion pumps and various silicone gel-filled devices such as testicular implants and breast implants, and spinal implants. The Hughs Identification Device has been placed onto such objects as breast implants. These tracking implants are reported to

have a life of 250 years. Their tracking I.D. number consists of #, letter, #, letter, # etc. The U.S. Navy has employed RF/ID “waterproof bracelets” for tracking individuals underwater. The U.S. military has required its personnel to take tracking implants under the pretense of being able to find them if they get lost, and millions of men and women in the military have already gotten these tracking implants. A book published by the U.S. Army War College in 1994 (entitled *The Revolution in Military Affairs and Conflict Short of War*) shows the Army’s interest in tracking implants. Many tracking implants were placed into military personnel during Desert Shield/Desert Storm operations. Some tracking implants are programmable and can record vital data about a person. They could also be used as a debit card for financial transactions, which is why they have gotten so much attention as the much feared Mark of the Beast. Texe Marr’s popular book *Project L.U.C.I.D.* exposed the L.U.C.I.D. System which will be a central clearing house for keeping track of everyone. He reproduced a diagram from an issue of *Narc Officer* magazine showing how the system would connect an individual’s universal biometrics card with the justice, data communications, and telecommunications systems of the World Order. Texe Marrs and others are fascinated at the choice of words & acronyms that the establishment keeps picking. Dr. Creusat, a medical doctor with Interpol is the official designer of L.U.C.I.D. He and his co-designer initially refused to reveal what the acronym L.U.C.I.D. stands for. Some speculate that it stands for the obvious: “Lucifer’s I.D.” system. It’s also strange that AT&T called their new company derived from Bell Labs (which has been involved in mind-control for the Illuminati) “Lucent Technologies”. Again some people speculate that Lucent means Lucifer’s Enterprises. And what did Lucent come out with? They came out with a new computer network called “Inferno” (another name for Hell), written in a language

called "Limbo" (a place in Hell) with computer protocols called "Styx" (a river in Hell). And then on the other side of the Atlantic, a world-wide net called Demon Internet is being offered to people in Europe. (To have Demon Internet installed for you by Demon Internet, Ltd. at 322 Regents Park Rd., Finchley, London N3 2QQ costs initially £1,762.50 for the first month according to recent company literature.) Again the obvious question, why are these companies using occult—even satanic terms for their products? Illuminati member and chairman of IBM Thomas Watson, Jr. set up a cryptology research group at IBM's research lab in Yorktown Heights in NY. This group was led by Horst Feistel, and it developed a cipher code called "Lucifer". Lucifer was then sold to Lloyd's of London. Lucifer was created under the auspices of the NSA. Lucifer worked off of an algorithm. The NSA had set things up via IBM so that it has had a back door to anything encrypted with Lucifer. (By the way NSA's partner in the U.K. is the Brit's GCHQ.) The paper trail indicates that L.U.C.I.D. intends to keep track of people by using biometrics (iris scan, fingerprint, voiceprint, photos, and other bio identification features) that will be encoded on cards (or implants.) DNA databanks are already giving computers an enormous ability to identify millions of Americans via their DNA. Texe Marrs also calls our attention in his book about L.U.C.I.D. to the important mandatory ISO 9000 program, which makes it mandatory for all products to have an ISO 9000 I.D. number and their approval and certification. Over 100 countries have adopted the ISO 9000 standards. In 1999, use of the system, which was voluntary, will become mandatory. The government is also setting up TPN (Trading Partner Numbers). While obtaining all these numbers to do business is not directly mind-control; if a person can't buy or sell without the approved numbers, it does tend to place a person or company under the World Order's control. The NACCB in England and the ASQC and

the ANSI have been given power to accredit people with the ISO 9000 numbers. IOS is also in some type of overseeing role in the accreditation process. Here we go, more acronym monsters to control our lives! But while attention has been focused on this, many other implants have been implanted for mind-control. It all works together. The tracking implants certainly are an external means of controlling people that will work along side of the mind-control to lock people into their Established System. The tracking implants have broader application than just to keep track of an individual's location, or his financial records. Tracking implants can be used to send bio information on the heart beat, the BEG, EKG and other bio tracking methods. Researchers who are following the field of tracking implants will remember the article "An Eight Channel Micropowered PAM/FM Biomedical Telemetry System" in the NTC '71 Record, p. 309. The Air Force Office of Scientific Research, NASA financed that study which involved an 8-channel micropowered telemetry system designed to sense and transmit physiological data. The system was actually successfully used. They will also remember an earlier article in the IEEE Transactions on Bio-medical Engineering, Vol. BME-14, Oct. 1967 entitled, "The Design and Use of an FM/AM Radiotelemetry System for Multichannel Recording of Biological Data." And then they will remember an even earlier report from the Biophysics Lab, of the Aerospace Medical Labs of the Aerospace Medical Div. at Wright Patterson AFB, Ohio dated 1965 entitled, "Personal telemetry transmitter system." The point is that tracking implant research has been with us for several decades, and is being utilized to control slaves who have body suits of implants. They have been publicly monitoring animals with bio-telemetry for several decades, it doesn't take any stretch of the imagination to comprehend that they are also doing it with

their slaves. While these articles were from the '60s, soon afterwards a book appeared Mackay, R.S.

Biomedical Telemetry, Sensing and Transmitting Biological Information from Animals and Man. John Wiley & Sons, Inc.: NY, 1970. Faceprints are a new method which uses a math algorithm that establishes distances between eye pupils, nasal base, lip center and other facial points. The algorithm produces a 50-bit number that is person-specific. The plans are to code this along with other unique I.D. features onto the magnetic strips of I.D. cards. The American CIA developed in conjunction with the Thai police a smart identity card for use in Thailand. The Computerworld Smithsonian Award was given to the Thai Ministry of Interior for this "innovative technology" in 1990. In other words, one part of Big Brother patted another on the back. Was the CIA protecting us, Mr. & Mrs. Citizens by doing this so-called "intelligence" work, or was it working on another agenda by developing this high tech ID card? Later the military adopted the MARC ID card based on similar ideas.

Bell Communications (in NJ) developed voice activated credit cards. Reports are that colds can throw one's voice off so that it's rejected by the flat microchip in the voice card. When this author calls the World Order's mind-control "total", he means just that-it is designed to control the body, mind and spirit of a person. By taking bio information via implants, DNA codes, blood types, retina scans, hand geometry and face prints, without our real consent the World Order has effectively stolen our Fifth Amendment rights. John Adams wrote, "Property must be secured or liberty cannot exist." (The Works of John Adams, Vol. 6:9, p. 280.) The purpose of the American government was to protect property. But they have stolen our privacy. They have put into law (contrary to the Constitution & Bill

of -Rights) several laws that will force us to provide information to computer data banks that will be used to determine if we can buy or sell, if we can get employment or not, & if we are deemed politically correct or not. And those on the wrong side of the NWO may be incarcerated and programmed. While tracking implants are not mind-control per se, they will work hand in glove with actual mind-control to make sure no one under mind-control can effectively get away. Therefore all tracking devices must be seen in the broader context as being devices to assist in the implementation of total mind-control. One genius scientist who worked on the bio-chip and who still works as a civilian for the government personally told this author that he is excused for his help on the project because technology is neutral. Technology is neither good nor bad, so he claims. I disagree, and so did another scientist who did repent of helping with this infernal project, and apologized to this author. These bio-chips are going to be used for the enslavement of mankind, and for total mind-control. There is no justification, no excuse great enough to allow people to side-step their responsibility in the creation of such technology intended for evil. We have a responsibility to know how our inventions will be used before we create them. It doesn't take a rocket scientist to know what these inventions are going to be used for. Unfortunately, this man who assisted with the bio-chip is a rocket scientist.

Section D. Direct monitoring & manipulation of the brain/mind

D 1. Direct monitoring of thought waves.

For many years, the basic waves have told us basic things about the mind. Rapid Beta waves come from normal mental activity like you are doing now, alpha waves

indicate relaxation, theta waves mean meditation & memories, & ultraslow deltas mean deep sleep. Cognitive demands cause the gamma waves to synchronize. Alpha (as well as Theta) oscillations both encode and access cortical codes-what we describe as K-lines in this Deeper Insights book. The thalamus & the cortex are involved in memory. People with good memories have higher alpha freks than persons with poor memories. EEGs are used to watch these waves & their oscillations. PET scans are even more revealing. Thoughts can be analyzed in terms of the various parts of the mind that they require to produce them. In word-reading the mind activates specific posterior visual areas, and when the mind must identify a noun specific frontal & temporo-parietal areas are active. (See Posner, "Seeing the Mind", Science magazine, 10/29/93, p. 673). PET scans & BEGs are interesting, but evoked potentials tell it all. The National Security Agency has a monopoly on monitoring the evoked potentials emitted by people's brain's electrical flux which are electromagnetic emissions in the 30-50 Hz, 5 milliwatt range. When a person thinks, or moves their body, or sees something, the brain creates an evoked potential or set of evoked potentials. These emissions can be decoded to see what the person is thinking or doing. This is called RNM (Remote Neural Monitoring). It is reported that the Kinnecome group at the NSA is involved with this type of monitoring round-the-clock of victims of electronic mind-control using EMF equipment that is scattered across the nation. A Signals Intelligence EMF scanning network allows the NSA's computers to pinpoint and track any individual in the United States by watching for their specific bioelectrical field. In many ways, the tracking implants and the national I.D. cards are redundant, but the World Order wants to increase their control, while keeping their best technology secret. The NSA information is not randomly passed on to any individual, but they do have their ways to filter down

information to mind-control handlers if they need to. They have exhibited an amazing ability to track the two co-authors, but that doesn't mean that they are all powerful, just because their computers can remotely detect and keep track of people. This book is evidence that there is still some elbow room for independent thought in this world. What's more frightening is the apathy in the world to stand up to the control. But the question may arise, how can they get any good reading on the brain's evoked potentials from a distance? The equipment is a combined use of ELF-modulated masers along with Doppler-shifted interrogative RMCT masers. This technique allows them to send syntel directly through walls. A Maser is a microwave equivalent to a laser.

TESLA WAVES USED TO READ MINDS & IMPLANT VOICES

According to reports, the Soviets were the first to discover in the 1960's that the human brain had 23 BEG band wave lengths, of which 11 of these were totally independent. By knowing those 11 band wave lengths, and then sending signals based upon those wave lengths, the human mind could be manipulated. The person's PRIME FREK, that is their biological frequency needs to be identified, and then it is possible to remotely implant thoughts and voices into their minds.

In the early 1970's, the U.S. Documentation Center as well as the White House's spokesman had both reported that electromagnetic waves could be used to communicate with "a target biosystem." (This was brought out in the U.S. District Court of the State of Utah where inmates who had been subjected to mind-control in prison tried unsuccessfully to fight back in court.)

The University of Utah was just one of several dirty research facilities which researched on human guinea pigs how Tesla waves could be used to manipulate the mind into hearing voices. They discovered how simple it is to use these waves to override and implant thoughts into the mind, and to read the thoughts of the mind. Then they subjected hundreds of inmates at the Gunnison Facility of the Utah State Prison, the State Hospital and perhaps other Utah State Prison facilities to this brand of mind-control in order to test it.

It certainly works. Numerous inmates tried to fight the system, and the obvious mind-control that so many of them were being subjected to. Hundreds of the inmates were subjected to heavy drugs and other severe punishment when they protested. Still they continued to protest. This was in the 1970's, now the technology is being used over the entire United States.

The Tesla waves are sent to a victim in the following sequence of events.

Computers programmed with artificial intelligence handle most electronic controlled slaves. When the slave does something the computer can't handle then human handlers step in to help. Men and women staff consoles attached to CRAY computers where they monitor the victims that need special attention. The full fledged electronic monitoring involves an entire body suit of various implant devices in the victim's body. From the body suit, the controllers are able to track the victim, hear what the victim hears, and see via tiny fiberoptics some of what is going on around and with the victim. The staff have pre-recorded sound bites that they usually like to select, as well as occasion actual live messages. They transmit these messages, which are picked up by satellite and relayed to whatever large TV

broadcasting antenna or GWEN tower or other antenna is near the victim. The signal is then relayed to some object near the victim, which serves as a relay antenna to pass the signal on to the victim. It's believed that some type of implant picks up the signal and broadcasts the correct Tesla wave pattern to create voices within the victim. Meanwhile, the tracking implant keeps the staff and the satellite system informed every few minutes as to exactly where to send the voice signals. The Master computer and central HQ for electronic mind control is reported to be Boulder, CO. Several places have been identified by this author as key points. One report came in that transponders are being made in Boulder, CO. The central cellular computer is in the Boulder, CO National Bureau of Standards building. AT & T is cooperating with electronic mind-control also. NORAD tracks both space and earthbound objects. They have a Cheyenne Mtn. Air Station. Although it is clear from reports from mind-control victims that NORAD is actively involved in mind-control, exactly how the different tracking responsibilities are delegated is not known to this author at this time. It appears that there is duplication of efforts, and several NWO branches maintain the same capability.

D 2. VOICES / OR THOUGHTS SENT ELECTRONICALLY DIRECTLY INTO THE MIND

Brain waves are connected to thought. When thought occurs there is a great deal of brain wave activity. The brain carries out what some people call "parallel processors"-that is it breaks a thinking process down into components and works on all simultaneously. When the World Order's researchers have attempted to tamper with the mind they can place thoughts into the mind by tampering with the processes that create thoughts, without actually having to replicate the thought they want. In other

words, they are deflecting the natural process into the synthetic process they want to get their desired result.

For group mind control, or isolated individuals, ELF waves can be sent that interact with the brain's natural waves. The human brain synchronizes with the incoming waves and the end result can be panic, sleep, or a hypnotic trance. The wrong kinds of ELF waves can even damage the brain. In 1961, Allen Frey, a free-lance biophysicist and engineering psychologist reported that humans can hear microwaves. This had been known by the military since W.W.II. To form complex words and sentences, Frey realized he'd have to approach the level of $10 \text{ -mW}/(\text{cm})^2$, but the bottom line is microwave-created movement of cochlear hair cells can be done. In the late 1950's, Dr. Patrick Flanagan developed an electronic telepathy machine which was called the Neurophone. He writes about the Neurophone and its capabilities to transmit acoustic (sounds, voices) directly into the brain of an individual using the electromagnetic fields in his forward to the book *Angels Don't Play This HAARP* by Jeane Manning and Dr. Nick Begich. The patent office held up his patent on the machine for 12 years. Dr. Flanagan writes, "Certain types of electromagnetic signals can induce visual and auditory effects when the field around the head or body is at the right frequency, intensity and modulation levels. We are not accusing the developers of HAARP of amoral intentions for the use of this technology but the potential for abuse is there." (*Angels Don't Play This HAARP*, p. 6) First, this author highly recommends the book *Angels Don't Play This HAARP*; and second, this author is going to flat outright say that the developers of HAARP do not deserve the benefit of the doubt anymore—because some of them have a clear track record of developing and using mind-control techniques. HAARP is nothing less than a mind-control project. One of the persons that people trying to

investigate HAARP kept running into was Col. John Alexander. Col. John Alexander was involved with the development of -HAARP. (Angels Don't Play This HAARP, p. 19) Trauma-based mind-control victims have identified Col. John Alexander as being one of the primary mind-control programmers. He has been a key player in a number of mind-control projects for the government. Wright-Patterson AFB, Dayton, OH also played a role in research for HAARP. A number of trauma-based mind-control victims have identified Wright-Patterson as a mind-control programming center. Apparently, the Air Force used some of the brain-stem scarred whiz kids at the base to try and develop Tesla technology. ARCO (via their ARCO Power Technologies, Inc. subsidiary) was the Air Force's prime contractor on the first phase of HAARP's development. ARCO has company doctors who are helping program mind-control victims. One of ARCO's board members was Dr. Simon Ramo, who is a big player with the military and the secret government. The awarding of ARCO's subsidiary APTI for the contract smelled like a rat, because other companies were obviously better suited than this tiny subsidiary with a staff of 25 in Washington, D.C. Besides the mind-control aspect of things, the World Order set things up so that APTI has the patent (#4,686,605, Method & Apparatus for Altering a Region in the -Earth's Atmosphere, Ionosphere, and/or Magnetosphere) for the HAARP project, so they are a natural shoe-in for the project. There were other patents involved too, and about dozen of these patents assigned to APTI have now ended up with the large Raytheon Corp. (APTI was bought by B-Systems, and B-Systems was bought by Raytheon. All 3 are working fast and furiously developing technology for the NWO.) The NWO's Stanford Research Institute developed many of HAARP's high-frequency transmitting programs with money from the Defense Nuclear Agency. (This was from Angels Don't Play This HAARP, p.47, which cites an

NTIA memo, "NTIA Preliminary Assessment of Air Force Ionospheric Research Instrument", 10/1/1993.) Mitre Corp. was also involved with HAARP. This author has exposed the Mitre Corp. in the past as being both Illuminati-run, & a co-partner with the NSA.

When a HAARP researcher pestered the Air Force for info, he was referred to Kirk-land AFB, NM another site deeply involved in mind-control and black projects. (Angels Don't Play This HAARP, p.63) Los Alamos Nat. Labs also is involved with both mind-control & I-IAARP. Their Blackbeard Team is connected to the Alexis Satellite, which may or may not be connected to the ALEX system which this author has been warning about. Supposedly this is a gamma ray re-search satellite, but this author doesn't know if this is the truth or a cover story. The Air Command & Staff College's Airpower Journal lets the "cat out of the bag" so to speak when they reveal that weapons like HAARP will be used against civilians. The military wants to use weapons like HAARP to disorient people's mental facilities. Newt Gingrich wrote the forward to an official US Air Force book entitled Low-Intensity Conflict and Modern Technology which described how electromagnetic weapons could be used to subjugate U.S. citizens who opposed their government. Cpt. Paul Tyler wrote the chapter on electromagnetic and psychotronic weapons. A paper trail does exist of the intentions to use HAARP for mind-control by our government. For the sake of completeness, and to provide the readers with a paper trail, I'll quote directly from this official Air Force book from the part written by Cpt. Tyler, "The potential applications of artificial electromagnetic fields are wide-ranging and can be used in many military or quasi-military situations... Some of these potential uses include dealing with terrorist groups...crowd control,...and anti-personnel techniques in tactical warfare. In all cases, the electro-magnetic systems

would be used to produce mild to severe physiological disruption or perceptual distortion or disorientation. In addition, the ability of individuals to function could be degraded to such a point that they would be combat ineffective. Another advantage of electromagnetic systems is that they provide coverage over large areas with a single system [this is an obvious reference to HAARP] Recently, pulsed electromagnetic fields have been reported to induce cellular transcription related to reproduction of DNA.... Knowledge of mechanisms of actions of Radio-Frequency Radiation (RFR) with living systems and the assessment of pulsed RFR effects, will demonstrate the vulnerability of humans to complex pulsed electromagnetic radiation fields... Experiments with elec-troshock, RFR experiments and the increasing understanding of the brain as an electrically-mediated-organ, suggest the serious probability that impressed electromagnetic fields can be disruptive of purposeful behavior and may be capable of directing and/or interrogating such behavior.” THERE YOU HAVE IT, a PAPER TRAIL that the MILITARY WANTS HAARP’S MIND-CONTROL capabilities. Dr. Abraham Liboff of Oakland Univ. has demonstrated how low-energy circularly polarized electromagnetic waves can change the brain’s ability to keep out certain ions, minerals, and chemicals. HAARP can also be used with genetic manipulating ionized radiation and chemicals to specifically control the mind. (See Chapter 8, section 2 for a complete discussion of this.)

SUMMARY OF ELF WAVE MIND CONTROL CAPABILITIES

Naval Intelligence and other groups have conducted research into ELF waves upon the human body and mind. Some of the many things that can be done to the human body and mind with ELF waves include:

- a. put a person to sleep
- b. make a person tired or depressed
- c. create a feeling of fear in a person
- d. create a zombie state
- e. create a violent state
- f. create a state of being sexually aggressive
- g. change cellular chemistry
- h. change hormone levels
- i. inhibit or enhance M(RNA) synthesis/processes
- j. control the DNA transaction process
- k. control biological spin and proton coupling constants in DNA, RNA & RNA transferases.

But electronic control of the brain comes in many forms. Perhaps the controllers only want to carry out mood shifts. ELF waves which will penetrate walls, and even go through the earth will create mood shifts according to how many cycles per minute they are sent at. Studies have proven that the time for ELF waves to cause a shift in mood is between 6 to 10 seconds (not a long time).

ELF waves below 6 cycles per second cause subjects to become emotionally upset and this rate may also disrupt bodily functions. At 8.2 cycles/sec. the person gets an elevated high such as would be accomplished by a master of meditation. 11 to 11.3 cycles per second cause the brain to become agitated and to begin riotous behavior. ELF waves could be directed at a population to help incite riots. Research has been carried out to determine how the brain's sensory inputs are coded. It has been determined that visual input is relayed and built into a series of changing maps. The olfactory sense has thousands of specific codes to determine smells, and combinations of these are triggered by an object. One clue that gave researchers initially the idea that different individual human brains have a common internal electronic type coding for specific thoughts is that drugs will have such

common effects on the human race—even -though one obtains individuals from widely different genetic pools. The best research is of course kept secret. We primarily have to report on what is released. E.R. John in Mechanisms of Memory (NY: Academic Press, 1967, pp. 348-349) announced his discovery that central neuro-electrical codes are indeed used by the human brain. Information transfers in the brain have been shown to be related to neuro-electrical frequency codes, and that a brain can be manipulated by beaming those codes from an external sources. For instance, Hippocampal neurons will have burst-firing frequencies between 100-200 Hz. Here are some of the resonance frequencies for manipulating these senses:

Visual centers of mind—25 Hertz
Sense of touch center—9 Hertz
Auditory (hearing) ctr— 15 Hertz
Motor control— 10 Hertz
Subconscious thoughts—20 Hertz

If the World Order wants to cause a person to make a gesture, they use ELF-modulated microwaves that are “KEYED” to distinctive brainwave patterns that are called “PREPARATION SETS.” If the controllers want to create an emotion they use specific “EXCITATION POTENTIALS” by creating the correct resonance frequency which in turn creates a specific emotional state. Victims of electronic mind-control often complain of electronic fields placed -around their bodies. Recently, when an electrical storm blew a major metro power grid, one victim of electronic mind-control lost the force field that had been encircling her body. The brain is also attenuated to the earth magnetic field. By manipulating the magnetic field around a person, the magnitude of the beamed codes needed to elicit a change in the brain can be reduced. For example J.I. Jacobson changed melatonin levels in subjects by manipulating the magnetic field in conjunction with beamed “signals”. See

Jacobson, J.I. "Pineal-hypothalamic tract meditation of pico Tesla magnetic fields in the treatment of neurological disorders." FASEB Journal, 1994, 8, p. A656. Sandyk also successfully used manipulation of the magnetic fields and reported this in Sandyk, R. Successful treatment of multiple sclerosis with magnetic fields. International Journal of Neuroscience, 1992, pp. 237-250. It was discovered that if an alternating magnetic field at a distance (resonance) frequency is superimposed upon a steady-state magnetic field, calcium and other ions within the brain can be moved with little energy. When this was discovered, researchers began to watch to see if variations in the -earth's magnetic field during geomagnetic storms and in other situations, would affect the thinking of masses of people. They discovered that there were indeed changes to the human brain as a result of magnetic fluctuations. Cognitive thinking and conscious -thought occurs between the temperatures of 308° - 312° K (or 35° - 39° C) and the fundamental wave length associated with these thoughts are approximately 10 micrometers (which is an infrared wavelength.) Signals that blend with Background Radiation can be manipulated to control the brain. The temperature of the brain directly relates to how certain signals will affect it. It is believed that structures within the thalamus are involved with modulating the temperature sensitivity of biochemical oscillators. Heterodyne Principle Used. This principle is that multiple frequencies when applied to a nonlinear device produce new frequencies which are the sums and differences of the applied frequencies and their harmonics. In other words a local oscillator (also called a strong sinusoidal carrier wave) can multiply a weak signal. A microwave signal at a frequency A is mixed with a microwave local oscillator at frequency B in a nonlinear mixer. The mixer output signal which is A minus B is a faithful amplitude and phase reproduction of the original microwave signal but at a low, fixed frequency so that it

can be measured simply with low-frek measuring devices. Heterodyne signals cost more to produce but cost is no problem for the government. Multiport network analysers, which use several simple power detectors and a computer analysis approach provide a less expensive way to measure both the relative voltage amplitude & the phase. Cell phone freks used. The controllers use the UHF cellular telephone frequencies, which are installed everywhere because the human cranium operates on the same frequencies that cellular phones operate on. This was not by accident.

PULSED AUDIOGRAMS–Pulsed audiograms use extremely low average power densities of electromagnetic energy acoustic amplifier driven by the rf transmitter's modulator, the peak power density is a critical factor which is approx. 275 mw/rf for carrier frequencies 125 mc and 1,310 mc. Acoustic noise is approx. 80 decibels. Another source, the electrical sine wave analogs of each word is processed so that each time a sine wave crosses zero reference in the negative direction, & a brief pulse of microwave energy is triggered. These voice modulated microwaves transmit words to the brain. Sounds are generated when pulsed microwaves are aimed at absorbers made of carbon-impregnated polyurethane. An Acoustical Energy Wavefront (AEW) is created by modified transducement of sound waves, which are in the ultrasound spec-trum (USS). In other words scalar energy is being employed. When people are asleep they are the most vulnerable. TV antenna can serve both as transmitters and well as receivers. It can be made to oscillate a suitable resonant frequency. By transmitting signals in the TV/FM range and then modulating them in the ELF/ULF range, they can send signals. The Nexus magazine of Oct.-Nov. '96 p. 16 reported on Dr. Ross Adley's research. Dr. Adley did some work for the CIA on their Pandora project (an electronic mind-control project). He recently worked at the Loma

Linda Univ. Med. School, CA. His research showed that the brain will react to EM radiation. To get a reaction the frequency, amplitude, and dose of the microwave radiation has to meet certain criteria. In the 1980's, his experiments showed that microwave carrier-waves modulated with ELF waves will modify brain tissue. Weak EM fields will affect the binding of calcium ions to neuronal sites. This type of information is the type of information that pertains to the genetic mind-control covered in Chapter 8. Dr. Adley was able to prove that a 147 MHz (megahertz) field, which at a tissue level had an intensity of 0.8 milliwatts per square centimeters, caused an efflux or release of calcium ions from the irradiated brain tissue. "This response only occurred when the ELF modulation of the microwave carrier-wave had an amplitude modulated at 6-20 hertz (Hz). The maximum stimulation of the neurones took place at 16 Hz, but to either side of this frequency-range parameter there was no effect." (Nexus, 10-11/'96, p. 16 citing Adey, Ross W. "Neurophysiologic Effects of Radiofrequency and Microwave Radiation" Bulletin of the New York Academy of Medicine, vol. 55, no. 11, Dec., '79) Also microwaves as they enter the brain tissue, cause thermal expansion as -things heat up at the microscopic level, which produces strains in tissue. The strains produce acoustic stress waves that are conducted through the bone to the cochlea, and the cochlea's stimulation by the wave gives the brain its perception of hearing a sound just as the cochlea's stimulation produces the normal sensation of hearing. For microwaves to do this they must be at 1310 MHz and 2982 MHz at the average power densities of .4 to 2 mW/cm². The peak power densities can be 200 to 300 mW/cm² and the pulse repetition frequency was from 200 to 400 Hz. This makes an RF auditory sound. The sound appears to the victim as coming from within or near the back of the head. 2 criteria needed to hear microwaves are the ability to hear above 5 kHz, and good bone conduction.

E1. ELECTRONICS TO AID HYPNOSIS

In a normal resting state the alpha waves of a person are between 6 -12 per second, and their breathing rate is about 20-40 breaths per mm. and their heart beat about 70 to 90 per minute. External stimuli will affect these rates. If a person fixes their attention on flashes and tones, such as what happens at some concerts, the body functions will tend to synchronize around the external tones and pulsing lights. It takes about ten minutes for the human mind/body to reconfigure itself in line with the external stimuli, then that rate of the flashing lights and tones and be lowered with a resulting lowering of the body's alpha wave rate, their breathing, and their heart beat. Electronics can be an aid to hypnotizing people. If vibrations that vibrate at the rate of six to seven cycles per second are created in a room of people, the vibrations will induce alpha waves in the minds of the people. The increased alpha wave activity makes the listening subjects more susceptible to suggestion. This is similar to the effect Vibrato has on the mind. Vibrato is a tremulous pulsating effect produced by a minute and rapid variation in pitch either by a cappella or instrumental music. Years ago, public performances of vibrato music was outlawed in England because so many listeners went into altered states. A 6- to 7-cycle/sec vibration can be mask behind other sounds. Hypnosis with headphones repeating "You do not know this" are used

simultaneously along with sonics as well as electrical patterns that scramble the brain.

E2. POLYGRAPHS FOR MONITORING PROGRAMMING AND MISSION ACCOMPLISHMENTS

Tyson II Corporate Offices, McLean, VA furnishes polygraph operators for the intelligence agencies, esp. Office of Security which is responsible for CIA polygraph examinations.

E3. ATTACKS on INDIVIDUALS and objects.

A victim of electronic mind-control in VA in a letter describing her torment writes, "I no longer have the stabbing pain in my back when I go in my back yard, as I did in Richmond; however, the pain from some type of directed energy weapon(s) is just as severe here as it was in Richmond. These electrical rays coming through the airways of my home cause me all kinds of physical pain and illnesses. They kill my house-plants; they kill my shrubs; they kill my vegetables and flowers in my garden; and most of all, they cause me tremendous amount of discomfort, as well as harassment." Can you imagine having electrical rays directed at your bottom day and night, 365 days of the year. Can you imagine what it must be like to live around oversexed SCUM?...This technology is based on Scalar Technology and the Schumann Resonances or Frequencies. It is my understanding that the Schumann Frequencies from 0 to 30 hertz can affect every nerve, every gland, every muscle and every emotion of a human being. In other words, a person in my neighborhood can beam these rays into my home and control my body and I am having to suffer from their stupid appetites..." (letter in author's files) Oscilloscopes have confirmed that some Direct ELF/VLF attacks have come from only a few feet. Electromagnetic

attacks sometimes hit the victims entire body, like defibrillator paddles. Masers (microwave equivalents to a laser are used for electromagnetic attacks that cause burns that look like "cigarette burns", favorite target areas are genitals, face and nose. The average power density can be at an rf such as 400 u_w/cm^2 . Let's quote another victim, whose letter is also in my files. At first years ago, they began using waves that were in the infrared spectrum that were barely discernable. The waves would target her and then latch on. Over the years they have gotten more sophisticated and more sadistic. She writes, "From time to time the field broadcast from my own head was in a 'field' about me, but, with the added feature of 'harrassment' voices also being broad-cast. These 'harassment' voices had taken a downright filthy tone, being blasphemous words, and venally oriented.... Before I was hit with the full-blown sadistic torture program I was awakened one night by a feeling of my head being raped. A light went on in my brain and I heard voices discussing me and cruelly laughing saying, "There, got her.".. .The first added torture (accompanied by filthy language, the language is all filth, obscenities, threats and intimidation) was a genital-urinary prod, pulsing about twice per second, and causing nearly incessant urination..., new added features ... are body bangs and head bangs.. .The arrogance with which they announce what torture will be next is unbelievable... .Other sleep deprivation techniques are loud noises, and the interposing of visual phenomena. They seem to have devised a computer imaging which taps the visual nerves- these are like bad dreams. I have had almost no normal dreaming since this system was locked onto me. Over the years she got to understand her harassers better. They have called themselves "social workers" and referred to her as "the package." They have enjoyed talking about her in front of her, and harassing her by talking to each other in public about the things she thought about the previous

night. Finally, one more account of a victim who is constantly harassed. "I am being tortured with synthetic telepathy of emotive and voice bytes played over and over again in my brain to positively or negatively reinforce and ultimately control my behavior. I get the sound on my left temporal lobe and in the right and left ear canals. I also get microwaved when I sleep and have vibratory pulsating fields on my lower spine, genitals, stomach, brain, feet or wherever. It is always in combination with the lower spine and something else. This seems to create an amnesiacal deep sleep with no feeling of pain. If I wake up suddenly (and this is the only chance I have of finding out what they are doing to me) I sometimes feel pain when the vibrations stop."

Other attacks and problems:

- Infra-sound attack
- magnets repelled from the cranium
- They use a "Gun" which sends an electromagnetic field which stops a car.

The Russians have been noted to have created a "woodpecker" signal, the American version of this is the American Buzzsaw. These signals are designed to interface with the mind. And systems are designed to be carried in helicopters, or to be placed on the ground. These signals are broadcast by multiple carriers which hop from frequency to frequency anywhere from 4 MHz to 30 MHz. With the switching of these frequencies, they are creating what is known as a Levinson Transform, named after Norman Levinson. VLF (Very low frequency waves) will cause bizarre behavior in people. (They use 0 to 400 Khz for mind-control operations. The signals are apparently

broken up into pieces and triangulated upon a target. Morse codes are used on some slaves to trigger them, which is sent via a number of methods. Victims often have the myelin sheathing of the brain disappearing, which is diagnosed as Multiple Sclerosis. MS has increased 100 fold over the past few years. Pre-conditioning is done by chemicals to the neuro-receptors in the brain and spine. When moving in a car or inside a store it is harder for a victim to be targeted. Also, as readers can imagine, signals being beamed from some tower or satellite will be blocked by large thicknesses of concrete, lead and -steel. In other words, there are some situations that provide limited shelter to the victims of implant body suits and syntel.

UNWANTED CHANGES

There is a complex symbiosis between mankind and the attributes of this planet. We are a life-form whose life is attuned to our environment. The human body at the cellular level has its physiological rhythms which are very attuned to the earth's electric and magnetic fields. When cosmic radiation cycles undergo unusual modifications, including cycle inversions, the metabolism in crabs and the oxygen consumption cycles in carrots, potatoes -shellfish and rats changes. The geomagnetic field helps protect us from cosmic rays. It has been shown that solar flares influence human behavior, and psych wards have an increase in problem behavior during solar flares. The human body is a complex set of rhythms. Permit me to recall some of these rhythms for the reader: Alpha rhythms, Blood Hormone rhythms, Body temperature rhythms (which fluctuate 3° on 24 hour cycle), Cell mitosis rhythms, Cellular DNA & RNA synthesizing rhythms, Cerebral-spinal fluid rhythms, Circadian rhythms, Enzyme rhythms, Food utilization rhythms, Menstrual & Sexual -rhythms, Pulse rates, Seasonal rhythms, and Urine Electrolyte Disposal rhythms.

The 60-pulse-per-second power grids (of AC) that are spread over the earth, as well as numerous other man-made activities are disrupting the 7-8 hertz frequency of the earth. There are some side-effects to our tampering with the magnetic and electrical fields of this planet, and some of these side effects may be the disruption or change of the circadian -rhythms (as well as some of the other rhythms of the human body and mind.) In fact, two researchers have research that shows how human nerve cells are affected by ELF fields. (See Becker, Dr. Robert O. Cross-Currents: The Perils of Electropollution, The Promise of Electromedicene. LA: Jeremy Tarcher, 1990, p. 233.) It was discovered by CIT researchers that the human brain has magnetite. Salmon, homing pigeons, whales, and honeybees also have magnetite, a type crystalline iron, which allows them to sense the earth's magnetic field for finding their way around. The CIT researchers published their finding about magnetite in human brains in the journal Proceedings of the National Academy of Sciences.

LIQUID CRYSTALS

For about 6 years this author has heard about liquid crystal implants. One military magazine should its use, and one person who was in military intelligence claims liquid crystals are used. Others claim that liquid crystals were tried and failed. It has also been reported that radio transmitting crystals, that fasten themselves to the brain have been the object of research.

Some ODDS & ENDS

- SERPENTINE SKIN

Another topic that for sure was tried by the NWO was serpentine skin. This is a type of specialized fungus that

coats the skin and is used for some of its specialized features. Whether this concept actually flies outside of the lab, this author doesn't know.

- "ALIEN" implants

This author's take on the alien phenomena is that it is the Illuminati's Grand Deception for introducing the AntiChrist. The aliens are materialized demons, and manufactured "soul less" bodies. It's not the purpose here to put forth evidence concerning this Grand Deception, that would take another book, if not several books. (In fact, this author started to write it in 1993, but never got finished.) But no book discussing implants & mind-control could be complete without -touching on alien implants. There is a great overlap between "alien abductions" and mind-control. Whitley Strieber (UFO abductee and famous author) gave two workshops at the UFO Expo West LA. He was very interested in finding out about the implants that Dr. Lear and Derrell Sims had extracted and turned over to traditional medical institutions for study. While Whitley was talking about implants and our government's connection to them, his own implant in his ear turned on and the side of his face turned red like a bad sunburn. Other UFO buffs in attendance also had their implants burn them at this point, causing great excitement at the Wyndham Hotel that day. (This information came from the internet madsongroup@earthlink.net)

There are an increasing number of "alien abductees" who are remembering seeing U.S. military personnel during their so-called alien abductions. The abductees are being taken to U.S. Military bases. (An unusual place for aliens to work, but within the realm of possibility.) The reason that the number of people who are connecting the government with the aliens is increasing is a. more people are receiving

mind-control programming, therefore there are more people for which the cover stories and electroshock fail to totally hide what has happened, b. better therapeutic methods are helping mind-control victims recover their memories better, c. there have been a rising number of people like this author exposing it. Karla Turner, who was a victim of mind-control and abductions, began catching on that the abductions were being done by our government. Vol. 2 quoted her on page 184. When she began to publicly expose what the government was doing, the government murdered her. (She joins a growing number of people this author has seen die pre-maturely because they were publicly exposing the truth.) Alien abduction victims have been reporting human black-or dark helicopter activity and black-or dark helicopter harassment since the 1970's. (Perhaps as the Vietnam War wound down & ended, the U.S. government had a surplus of helicopters and delegated some to task forces that picked up mind-control victims in remote sites.) An example from this time period of an alien abduction also involving helicopters is the Betty Andreasson/Luca abduction. A number of victims have remembered the helicopters coming -around the time of their abduction. When bright lights are shined into their houses or into their cars these victims of trauma-based mind-control are programmed to see the helicopter's spotlight as a UFO. (Helicopters also carry spoofer transmitters.) Beth Collins of Oregon reports in her book *Connections - Solving our Alien Abduction Mystery*. Newberg, OR: Wild Flower Press, 1966, about how helicopters were involved with her abduction experiences. She lives in an area that is a hot-bed for covert CIA activities. In her book, she provides a transcript of memories of military personnel being the guilty party in an abduction. Some victims of these abduction experiences are implanted during their abduction. Researcher Helmut Lammer reports that "alien" abductees Debby Jordan and

Leah Haley had implants removed from their ears. What is significant about this, is that the bio-chip implant designed for humans which is credited to Dr. Man, best works behind the ears. (Sources: The Kansas City Star, 7/19/87 carried an article about how Dr. Man's implants work best behind the ear. On Oct., '87, an article by Kathy Hart was run in several papers promoting Dr. Man's implants for protecting children. H. Lammer reported on implants & military involvement in abductions in his article "Preliminary Findings of Project MILAB: Evidence for military kidnappings of alleged UFO abductees." The Unopened Files, No. 2, '97, pp 64-67.) From this author's interviews with "alien abductees" it was clear that 100% of them were victims of U.S. government trauma-based mind-control and that many of them had been taken to underground pro-gramming facilities and made to believe they were at another planet. This is happening in foreign countries too. However, this doesn't mean that flying saucers craft do not exist, they do. And according to eye-witnesses some of the underground facilities in NM, AZ, and CO have personnel from all over the -world, Germans, Russians, British & Americans as well as aliens working side by side. (The American government denies this. Supposedly NORAD only has Canadians.) Some of these witnesses come across as credible. If their reports are true, then some implants may also have a true alien connection. Alien abductees are actually extracting implants from their noses and their feet. It is strange that -"alien" implants have gotten more technologically sophisticated over the years.

BED COILS STANDARDIZED FOR MIND-CONTROL POTENTIAL

Metal coil springs were standardized in size, are made of steel and are placed in a grid pattern in a common

mattress. Standards were introduced that specify how many coils, and what tension were to be used in their manufacture. Their shape is an open ended hyperbolic which is the best suited to create a similar induced magnetic field. When one lays down the springs are compressed and have between 5 to 7 coils compressed. This makes a field of influence around the human body which is enfolded within the field of coils, which are natural antennas to incoming electromagnetic waves. Evidence suggests that the standardizing of bed springs was a carefully planned event designed to assist electronic mind-control.

E4. VIRTUAL REALITY.

Since 1989, Virtual Reality conferences-exhibitions have been held. On May 11-13, 1994, the largest conference-exhibition to date on virtual reality was held at the San Jose Civic Center and the Fairmont Hotel, San Jose, CA. Note some of the mind-control aspects of the different sessions:

Session C7-“Tactile Feedback” given by Paul Cutt.
Xtensory Session C8-“The Immersion Probe” given by Louis Rosenberg, Pres. of Immersion Corporation.

Session D2-“Biomedical Technology and Biomedical Education” given by John Flynn

Session D9-“Biocybernetics and VR” given by Dave Warner, Medical Scientist at Loma Linda Univ. Med. Center During lunch Kenny Meyer discussed how simulated being in a virtual world are called various names incl. synthetic actors, situated agents, creatures and denizens. At another meal break Lt. Col. Martin Stytz, USAF, spoke on how the military was developing Virtual Reality to train men.

Session C17-AFIT Projects, that is Air Force Institute of Technology at Wright Patterson AFB given by Elizabeth Block. (Wright Patterson happens to be a major hub for the mind-control and criminal activities of the secret government.)

Session C19-“ARPA/ASTO” given by Lt. Col. David Neyland.

The military is not the only group interested in virtual reality. A plethora of virtual reality companies has sprung up, for instance Sense8 (which selling ready-to-use virtual reality systems), the Vivid Group which creates Mandala (which are virtual reality authoring systems), and Xtensory Inc., which creates virtual reality tactile feedback systems. The government also works through labs located on American universities working with government grant money, such as the state of the art Virtual Reality lab at the Univer. of Illinois Circle campus, which calls its virtual reality machine “the Cave.” Virtual touch has been created. This means that with a special machine for the person’s hand (for shape perception) & special glove (for texture sensing) the computer users can feel the shape and texture of an object on the screen.

Hollywood has given us movies showing the mind-control potential of virtual reality in Lawnmower man & Brainstorm. For more information on virtual reality the reader might try consulting:

This author has a catalog advertizing the EMCS-X-3000-Plus Electronic Mind Control System, which was invented by Cabalistic Hermetic magician Karl Welz. The ad states, "If your intentions are to take control of others and to increase your own mental powers of direct action, then the EMCS-X-3000-Plus is your system of choice!" The article has an endorsement for the BMCS system on page 19 by a charismatic minister, "...I am a preacher of a charismatic church. for reasons you may understand, I was extremely skeptical initially [of the EMCS system]. However, I gave the new technology a chance to help me serve the Lord better, and I do not regret that decision! The membership of my church has more than doubled within one year ... Thank you very much." —We live in some perilous times! Maranatha!

The American military establishment lumped syntelex and a number of other outrageous "weapons of torture and control" under the official heading of "non-lethal". Then the establishment media (TV & newspapers) such as the Wall St. Journal, Aug. 2, '94, had an article about non-lethal weapons where they wrote about the sticky-goo gun", which uses goo to stop people. Do you see how they create a cover? When the public hears of non-lethal weapons they think sticky-goo guns, not implants that are torturing and controlling people.

Herman Kahn of the Hudson Institute stated that total mind-control would be in place by 2000 and could be "imposed under the rubric of mental hygiene."
